SEALight

Door illuminated front seal

The market best door
visual indicator

SEALight is an exclusive door illuminated seal with monitoring system for mass transit applications on new cars or retrofit.

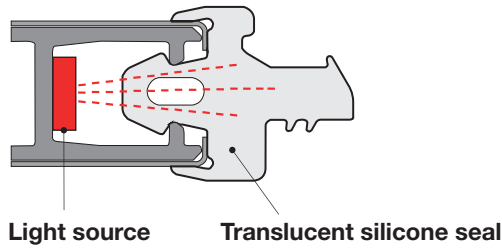

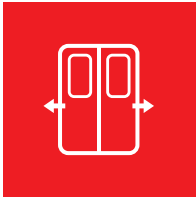

Key functions:

- Door visual indicator
- Safety / dysfunction warning
- Visual countdown prior to the door closure
- Indication of passenger load

CUSTOMER BENEFITS :

- + Unprecedented visual effect
- + No deterioration of door robustness and watertightness
- + Spreads light inside and outside
- + Always fully visible for an efficient passenger flow
- + Quick and easy installation on new/existing cars

Product specifications

Fully customizable

Any color, any pattern, variable intensity

Seal material

Translucent silicone

Resistance to vandalism

Higher tear strength versus EPDM
Light source is hidden and not accessible

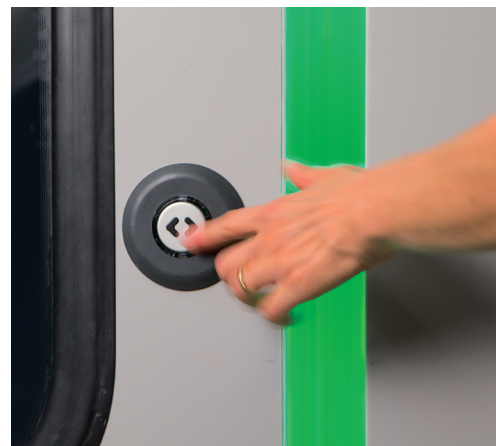

Life time

Doubled life time versus EPDM
15 years versus 8-10 years

Applicable standards

Compliant with:
PRM TSI (1300/2014/EU) §4.2.2.3.2.
EN 14752:2015 for watertightness
